

Larry D. Ratliff II

Vice President-Operations

ldratliff@terratecheng.com

Education: 1985 – Graduate Grundy Senior High School
 1990 – B.S. / Mining Engineering – Virginia Tech

Years Experience: 26 years

Qualifications: Mr. Ratliff is a partner of the firm and serves as Vice President-Operations. Along with his planning and administrative responsibilities, he is directly responsible for all company engineering department teams, with a leadership role in the planning, design and development of all major projects. He has extensive experience in both mining and environmental engineering during his previous employment with major coal corporations and consulting firms. He has experience in and has directed projects involving the following: surface and underground reserve studies, mine subsidence, mine planning and design engineering, construction management, road design, surveying, environmental audits and feasibility studies for the coal industry, stream and wetland delineations and stream mitigation plans. He also has extensive experience in coordinating with local, county, state, and federal government entities as required to secure the necessary regulatory permit approval for the client.
